

LORANDI®

BULK MATERIALS TECHNOLOGY

Storia Historia History

Era il 1952 quando ad opera di Giuseppe Lorandi ebbe inizio la nostra azienda. Ci ritagliammo uno spazio importante nel campo agricolo, enologico ed anche chimico fornendo ad importanti aziende locali cisterne in acciaio inox, coclee e macchinari, alcuni brevettati proprio dal signor Giuseppe. Con il passare degli anni la crescita coincise con la partecipazione a fiere italiane, acquisendo clienti in tutta la penisola e sempre più ci fu una specializzazione nello stoccaggio e movimentazione di prodotti polverosi e granulari diventando partner tecnologici di aziende alimentari, agricole e chimiche di assoluto rilievo, fornendo anche macchinari speciali sperimentali industrializzati poi negli anni. Oggi i nostri tecnici sono sempre in volo da un capo all'altro del mondo a collaudare nuovi impianti per le maggiori aziende che ci riconoscono specialisti in stoccaggio, trasporto e dosaggio. Dal 1952 ad oggi siamo cresciuti, ma è sempre la stessa famiglia che con grande impegno e cura segue con passione ogni cliente, con lo sguardo sempre rivolto al futuro.

En 1952 Giuseppe Lorandi fundó nuestra empresa. Dedicándose con mucho trabajo a los campos de la agricultura, a la enología, al químico y suministrando a importantes empresas locales las cisternas en acero inoxidable, los sin-fines y la maquinaria, algunas con patentes del Sr. Giuseppe. Al pasar de los años y el crecimiento coincidió con la participación a las ferias italianas, con nuevos clientes de toda la península italiana, nos especializamos en el almacenamiento, el transporte de los productos como el polvo ó el grano, convirtiéndonos en socio tecnológicos de las industrias alimenticias, agrícolas y químicas de gran importancia, proporcionando con los años máquinas especiales experimentales para la industria. Hoy en día nuestros técnicos están siempre en vuelo de una parte a la otra del mundo probando nuevos sistemas, para las mayores empresas y nos reconocen como especialistas para el almacenamiento, el transporte y la dosificación. Desde 1952 hasta hoy hemos crecido, pero siendo de la misma familia que, con gran esfuerzo, cuidado y con gran pasión para cada cliente, con la vista puesta en el futuro.

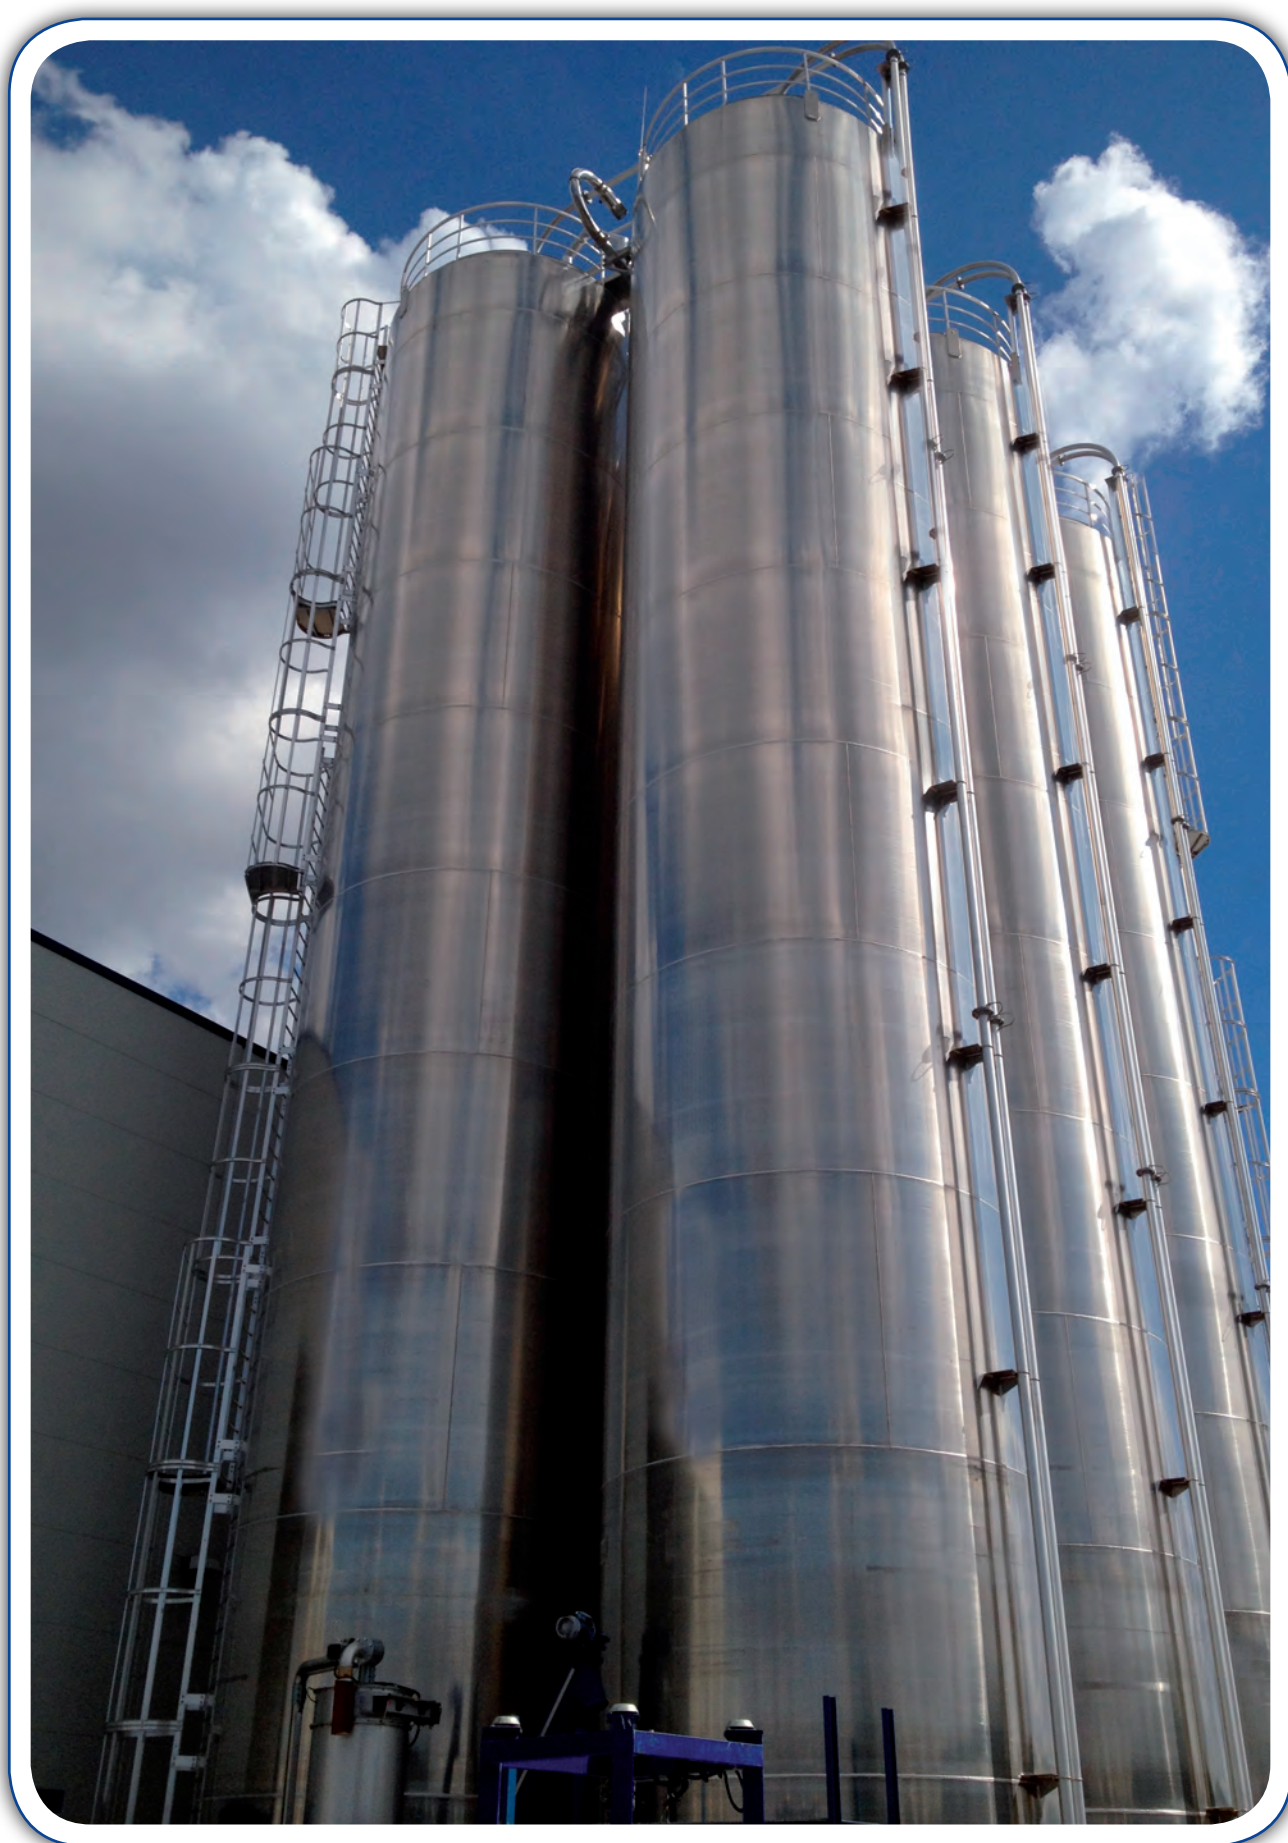

It was 1952 when, thank to Giuseppe Lorandi, our company had beginning. In the reconstruction industry of Brescia we cut an important space in the agricultural, wine and also chemical field, supplying to important local companies silos in stainless steel, screws and machinery, some patent to you just from Mr. Giuseppe. With passing of the years the increase coincided with an expansion outside Brescia, participating to Italian fairs was acquired customers in all the peninsula and more and more there was a specialization in the charge and handle of dust and granular products becoming technological partner of alimentary, agricultural and chemistries companies of absolute relief, supplying also special sperimental machineries industrializes then with passing of the years. Nowadays we feel many legacies to our territory, but our technicians are always in flight from a head to the other of the world to test new systems for the greater companies of the planet that honor us of their confidence like charging, transport and dosage specialists. From 1952 today we have grown, but it is always the same family that with great engagement and cure follows with passion every customer, and listen and realize always with the look turned to the future.

SILOS IN ACCIAIO INOSSIDABILE MONOLITICI
SILOS SÓLIDOS EN ACERO INOXIDABLE
MONOLITHIC STAINLESS STEEL SILOS
