## FW80/6

Volumetric and gravimetric

### General Information

The FlexWall® Plus [FW80/6](#) feeder is ideal for free flowing bulk ingredients. The feeder has the following main components: a stainless steel trapezoidal housing, flexible polyurethane trough with a large cross-section, a screw, a screw tube, 3 phase motor and a trapezoidal extension hopper with volumes of 100 dm<sup>3</sup> (3.53 cuft) or 200 dm<sup>3</sup> (7.06 cuft).

The shape of the trough provides a consistent screw filling and mass flow without ingredient deterioration.

Screw removal of the FW80/6 is from the front only.

The FlexWall® Plus is easily disassembled for wet or dry cleaning as the polyurethane hopper that is attached to the housing is easily removed. Moreover, the [compact trapezoidal shape](#) allows up to 6 feeders to be arranged around a central feed point. Service can be from the front or back.

The gravimetric version includes the analog weighing system [MS6](#), or the digital weighing systems [DLS6](#) (Digital Load System) or [MD6](#) (for highest measurement accuracy), both featuring a high resolution robust digital load cell with serial data transmission and advanced filtering technology.

The unit conforms to CE directives.

### Model Specification

Screw drive	fixed
Drive power	0.37 kW (0.5 HP)
Screw speed	198 min <sup>-1</sup>
Screw speed optional	346 min <sup>-1</sup>

### Control modules

Control and speed modules are offered either mounted onto the feeder ([Congrav® CM-E](#)) or are available for mounting in a separate control panel ([Congrav® CB-E](#) or [Congrav® CB-S](#)).

Controls can communicate directly to most host/ PLC systems or to Brabender Technologie Congrav® Operator Interfaces.

\* Theoretical values at 100% screw filling level and motor speed. Depending on the flow characteristics the screw filling level may decrease to 50%. Further limitations must be considered for gravimetric feeding, as max. speed should be reduced to allow for bulk density variations.
