# **Brabender MicroBatch Scale MB-50**

The Brabender MicroBatch Scale is a smallsize scale for automatic batching of small ingredient amoutns according to the gain-inweight principle.

The central unit of the scale is a weighed bowl, which automatically tilts over after completion of the batch and discharges its contents. The 360° turn and the semispherical shape ensures complete discharge without residues.

The Brabender MicroBatch Scale is suitable for all flowable bulk ingredients, particularly with poor flow characteristics, and can be combined with all kinds of feeding devices. High accuracy is achieved by using coarsfine flow feeding or "A.R.T." mode (= Automatic Rate Turndown) with total speed control over the whole turndown range. Here, feeder speeds are run down in a curve function from a "turndown" point automatically computed by the Congrav<sup>®</sup> microcomputer controller that belongs to the scale to the switch-off point also autocomputed by the controller, thus achieving even better accuracy. The feeders are also fully controlled by the microcomputer controller. Complete single or multiple ingredient batching stations with Brabender feeders and common support structures are available as well as versions with special interfaces for integration in OEM systems.

Weight approx. 70 kg

Brabender Technologie GmbH & Co. KG, Kulturstrasse 55-73, 47055 Duisburg, Germany, Tel: +49 (0) 203 9984-0, email@brabender-technologie.com Brabender Technologie Inc., 6500 Kestrel Road, Mississauga, Ontario L5T 1Z6, Canada, Tel: 1-905-670-2933, sales@brabenderti.com

# **Technical Data**

#### Configuration examples: Brabender MicroBatch Scale with feeders

#### **Component Groups**

- Stainless steel base plate with vibration isolation pads
- Brabender weighing ystem
- Tilt-over weighing bowl, volume 50 dm<sup>3</sup>, tilting range 360°
- AC tilting drive with maintenancefree worm gearing
- Stainless steel cover for weighing system and tilting drive
- Junction boxes
- Stainless steel downpipe enclosing the weighing bowl

Design: fully assembled and wired to junction boxes

#### Accessories

- Cover for downpipe with inlet pipes (number and arrangement dependent on upstream feeders) and vent pipe
- Flexible sleeves for inlet pipe, vent pipe and outlet
- Double blade valve for the downpipe for dust-tight sealing
- Brabender feeders, e. g.
  Brabender FlexWall<sup>®</sup> feeder
  - Brabender MiniTwin feeder
  - Brabender RotoTube Micro feeder
  - Brabender twin screw feeders
  - others (see the respective
  - Brabender Works Standards)
- Pneumatic quick closing valves for outlets of Brabender feeders

#### **Tilting Drive**

- Synchronous AC motor
- Power input: 120 W
- Voltage: 220-415 V, 50 Hz
- IP 65 rated enclosure
- Insulation class F

## Weighing System

- Brabender weighing system
- Weighing range optionally 30 kg or 55 kg net

#### Materials

 Ingredient contact steel parts (basic version and accessories) are made of SS 1.4301 (304), weighing bowl optionally teflonized

#### Control

 Microcomputer controller Congrav<sup>®</sup> for feeder control in coarse-fine flow or in A.R.T. (Automatic Rate Turndown) mode gradually reducing the feeder speed over the whole turndown range (available for variable speed feeders only)

A.R.T. mode:

Batch Time Prestop point Setpoint Correction

### Options

- Complete single and multiple ingredient batching stations including Brabender feeders and support structures
- Versions without controllers with special interfaces for integration in OEM systems
- Special discharge aids
- Calibration system

Modifications reserved. All data describe our products in a general manner. They are no agreement on or warranty of characteristics in the sense of § 434 or guarantee in the sense of § 443 of the German Civil Code or similar regulations and effect no liability.

Issue 7.0 (July 16) Supersedes 2.0 (February 08)
